Whereas the Nation is witnessing a historic decrease in the health of the youth in the United States, with only 22 percent of the youth being physically active for the recommended 30 minutes each day and nearly 15 percent of the youth being almost completely inactive each day;

Whereas physical education classes are on the decline, with 75 percent of students in the United States not attending daily physical education classes and 25 percent of students not participating in any form of physical education in schools, which is a decrease in participation of almost 20 percent in 4 years;

Whereas more than 60,000,000 people, 1/3 of the population of the United States, are overweight;

Whereas regular physical activity has been proven to be effective in fighting depression, anxiety, premature death, diabetes, heart disease, high blood pressure, colon cancer, and a variety of weight problems;

Whereas physical fitness campaigns help encourage consideration of the mental and physical health of the youth in the United States; and

Whereas Congress should take steps to reverse a trend which, if not resolved, could destroy future opportunities for millions of today's youth because a healthy child makes a healthy, happy, and productive adult: Now, therefore, be it
